ARLAN WISE
Writing Workshop for Astrologers

During our three sessions together we will learn basic, journalistic techniques as we have fun doing exercises to practice “translating” astrological events and symbolism into plain English. We will write longer pieces on various topics, read our work to each other, discuss the pieces of writing without criticizing, and help each other discover and gain confidence in our writing strengths. We will encourage each other to start/continue/finish our personal writing projects. The goal for the track is that by the end of the conference we will each have an article to submit for publication.

All levels

CHRIS MCRAE
Horary In Three Parts

Horary captures a short space of time when a matter is pressing and requires an immediate answer. It is the art of judgment in a moment of time. Learn when to ask and where to locate the question; to employ all the basics of the horoscope you've learned, perhaps even forgotten and yet to learn in delineating a chart. There is much common sense astrology in Horary and some new techniques in interpretation. Learn the Traditional William Lilly approach and see reasons to use both new and older relationships. We will also cover Electoral Astrology, which is the art of choosing a propitious time for an event: marriage, opening a business, etc. Many interesting charts will give you much practice in the art of judgment.

Intermediate, Advanced

MAURICE FERNANDEZ
Relationship Dynamics and Sexuality: Understanding the Evolutionary Reasons Behind a Relationship

Join Maurice on this important study about relationships needs and sexuality, and identifying in the chart who two souls come again together. We will discuss evolutionary aspects in the chart, and assess the best way to make the best out of relationships by using Maurice’s unique compatibility assessment methods.

Intermediate, Advanced

DONNA YOUNG
Hand Drawing the Chart: The Foundation of Astrology

Learn to draw a chart by hand. Knowledge of chart calculation is required for certification with NCGR, AFA and ISAR, but even if certification isn’t your goal, understanding how a chart is built will ground you to the chart in a more solid way. Participants who would successfully complete the assignment would be granted a KEPLER COLLEGE pass in the Level 1 Math class. They would only have to pay a small material fee if they decided to take Level II. The Kepler diploma already gives people an automatic NCGR Level III so we know it’s on par with their expectations.

All levels

SANDRA-LEIGH SERIO
Astrology & Spiritual Evolution

The birth chart is a map of the soul in your early incarnation. The workshop will focus on your life purpose, spiritual path and the roadblocks encountered as well as the drama and karma of the birth chart map. We will look at the importance of the nodes, pre-natal eclipse, planetary aspects and ascertain past life indications. Other pertinent points in your chart will be analyzed to help you understand your place in the world.

Intermediate, Advanced

Peer Group Process

These tracks offer OPAs trademark and unique learning process where participants go through peer-group work to refine their skills as professional astrologers. Together, we discuss the different issues of our profession, analyze each other’s charts, and reflect on possible problematic episodes that have emerged during our practice and client work. The advantage of this program is that it allows participants to express their own unique style, while at the same time developing their skills, talents, and techniques in a much more personal, meaningful manner, all essential in the practice of professional astrology. The development of self-knowledge is an equally important part of the curriculum. We will explore how we each plan to enhance our professional practice as astrologers, creating a business plan with goals we hope to achieve in the coming year. Participation in this track is a step toward becoming certified in OPAs Certification Program.

Practicing Astrologers

**Accommodations:** Choose to stay at one of the different hotels within walking distance:
